

**PIRSON** MONTAGE

## **« Fleet manager - cranes »**

### ***Permanent Contract***

#### **Function:**

The fleet manager will work with Project and Site Managers. He ensures fleet availability of cranes and heavy transport devices:

- Assist project engineers during preparation of rigging and heavy lift execution drawings and calculations
- Organize and assist in mobilization and demobilization of big cranes (up to 300 tons)
- Be in charge of creating assembly procedures for the cranes
- Be in charge of devices maintenance according manufacturers regulations
- Manage staff of crane operators
- Ensure all personnel have been deemed competent on the equipment they are operating
- Ensures schedules outlined by the Operations Manager are executed
- Able to diagnose and/or determine technical problems and to find solutions quickly
- Develop solutions to minimise loss of availability

#### **Profile:**

Bachelor degree in electro-mechanical discipline.

No experience is required. Specialized training will be organized by the company

You demonstrate good interpersonal skills, team spirit, flexibility, positive can-do attitude

You are well organized and can cope with stress

Willingness to travel as project requirements, mainly in Belgium and Germany

Fluent in French and English. German would be an asset. Agree to follow language courses in one of these languages

Safety and quality orientated

We propose a permanent contract that offers to competent and ambitious candidates a motivating and developing career.
