

Test/Trials Manager – Test/Trials Engineer

Full time, Regular Employment

Location: Herstal, Belgium

Thales people architect solutions that are relied upon to deliver operational advantage at every decisive moment throughout the mission. Defence and armed forces customers rely on us to deliver the full range of defensive systems for land, sea, and air. From early warning, to threat neutralisation, our platforms cover all levels from very short-range systems, to extended protection across the entire battle-space including Airspace Mobility Solutions, Vehicles and Tactical Systems and Missile Defence, Optronics, and Radar.

Thales Belgium SA, Belgium competence center of Thales, is a company located on 2 sites, one in Tubize (near Brussels) and the other one in Herstal (near Liège). Thales Belgium, which employs more than 230 collaborators, is specialized in the design, development and supply of critical information systems for customers in the sectors of Defense, Security (including Cyber), Transport and Aerospace.

Mission:

As Leader of the test department and test team inside THALES BELGIUM on Herstal and Evegné sites, the test manager will be responsible for organizing and performing all trials requested internally, assuring the complete management of the test facilities and proposing future investments .

Responsibilities:

- * Preparation, organisation and launch of trials requested by other departments (including pyrotechnical product management) in Thales Belgium facilities, external facilities and/or on military firing ranges.
- * Elaboration of complete test reports linked to the performed tests in time.
- * Realization of the global test planning (including a daily follow-up) and follow-up of the correct allocation of the necessary test facilities.
- *Preparation of the list of the test capacities and management of these on Herstal and Evegné sites (user manual elaboration, maintenance management, user trainings)
- * Providing assistance during firing campaigns abroad for Program and After Sales services
- * Realization of firing procedure for military firing ranges
- * Training of back-up colleagues on test facilities
- * Continuous improvement related to the test facility upgrades and investigation on the possibility to invest in new test means.

* Daily management of the team

Profile:

- Electro-mechanical engineer (**young graduated are welcome to apply**)
- Pyrotechnical interest or knowledge
- Autonomous
- Rigorous
- Experience in writing technical tests is an asset
- Able to manage a team
- Fluent in French and English
- Ready to travel abroad
- Knowledge or interest for the Defense sector
