

Technical Product Engineer – Visé (Belgium)

MC Technics was created in 70's and joined the group the Gazechim in 2016. We are the distributor of raw materials, equipment and accessories for the composite industry. With its two operational offices in the Netherlands and Belgium, **MC Technics** has a leadership position in the Benelux. With an experienced team and the availability of an R&D laboratory, **MC Technics** provides expert customized advices and introduces innovative solutions for a market that is constantly developing.

To meet its exciting challenges, **MC Technics** is looking for a new **Technical Product Engineer**.

Do you like to create new solutions? Do you have an affinity with materials and their properties?

As **Technical Product Engineer**, you will join the Technical Support team with its two experienced engineers who will train and guide you. At the end of this training, you will be ready to tackle customer requests with independency and versatility.

Your responsibilities will be mainly based on 3 aspects:

- **Specific knowledge:** understanding the product range, both from a technical and technological point of view. Understanding how and why they are used (product composition, use, processes).
- **Sharing knowledge:** being able to provide technical support, both internally - to colleagues - and externally - to customers - by phone, by email, at the counter or during a customer visit.
- **Market knowledge** and relationships management with suppliers and customers.

Your function will consist of:

- Following specific customer questions, providing appropriate advices.
- Processing raw materials and preparing laboratory tests to provide customers testing opportunities / facilities.
- Preparing technical reports, sharing technical data and compiling files.
- Finalizing customized quotations for customers.
- Sharing your knowledge as an expert.

Your profile?

You have a degree in **engineering** (industrial, chemical, ...) - recently graduated (or soon) or with a few months of professional experience.

You have a fluent knowledge of **Dutch** and **French** (both oral and written) - **English** is a plus

You have a **strong interest in technical subjects** and are eager to learn.

You are **curious** and like to combine **creative ideas** and **practical tests**. You like to invent and reinvent.

You are willing to **share your knowledge** and adapt to your interlocutor in a constructive way.

You have a certain **commercial spirit**, you appreciate **customer relationships** that are focused on satisfaction and adequately respond to expressed needs.

Integrity, respect, politeness and a **sense of service** are values that appeal to you.

MC Technics offers you:

An open ended contract with career opportunities, "on the job" training and appropriate guidance, to transform opportunities into realities.

A unique opportunity to give your career an innovative turn.

A competitive compensation package: a market conform salary and additional advantages, including potentially a company car at the end of the internal training period.

How to apply?
