

## PROJECT MANAGER ENERGY - NL

### Function :

- In collaboration with all stakeholders, the Project Manager organizes the tasks to complete the projects in accordance with the project's contractual specifications, while respecting: delays, budgets, safety rules and imposed quality standards.
- Based on your knowledge of the market and your experience, you coordinate, organize and write technical and commercial tender documents.
- You manage the commercial relationship with your customers throughout the realization of your projects (from the offer to the final reception).
- With the purchasing departments and your managers, you select your suppliers and subcontractors and negotiate the commercial conditions.
- You determine and write the implementation schedules and implement the means necessary to achieve all the contractual objectives.
- You ensure the complete management of your projects.
- The projects take place in Belgium. But depending on the expertise developed and market opportunities, projects could take place abroad.
- You manage a portfolio of projects with annual turnover and profitability targets.
- You present and defend the results of your projects to management during budget control meetings.
- You lead and organize safety actions in order to maintain "zero accidents".
- You maintain and develop the growth potential of our clients and seek new clients.
- You define and coordinate your teams in consultation with the other departmental project managers.
- You actively participate in the development and improvement of the department.

### Profile :

- Master's degree in electromechanics or energy.
- An equivalent experience of at least 3 to 5 years in this function is required.
- The position is also open to Bachelors or other Masters with solid experience of at least 10 years in energy efficiency solutions.
- Perfect command of Dutch (written and spoken) with good spelling.
